

KAAZHIM NUR KAARIM BIN RAHIM

IT Intern, Technology and Digital Unit | IT Support | Application Support | Junior Software Developer

Sungai Buloh, Selangor, Malaysia | 014-311 3455 | 017-311 3477 | kaazhim03@gmail.com | linkedin.com/in/kaazhim-kaarim-7019a427b

PROFESSIONAL SUMMARY

Information Technology undergraduate with a CGPA of 3.55, current hands-on internship experience in Technology and Digital operations at Encorp Berhad, and prior IT project execution experience at Youths Today Sdn. Bhd. Experienced in end-user IT support, application support, printer and network troubleshooting, BPMS/ProcessMaker workflow development, Power BI reporting support, SQL/database projects, and UI/UX prototyping. Gold Medalist at the Kuala Lumpur International Invention & Innovation Symposium 2024 as a Future Inventor.

. Strong fit for IT Support, Application Support, Junior Software Developer, and Business/Digital Operations roles.

CORE STRENGTHS

IT troubleshooting | Application support | Business process workflows | Power BI | SQL databases | Web development | UI/UX prototyping | Technical documentation

EDUCATION

Universiti Teknologi MARA (UiTM), Shah Alam | Bachelor of Information Technology (Hons.) | CGPA: 3.55 March 2024 – July 2026

Universiti Teknologi MARA (UiTM), Jasin | Diploma in Computer Science | CGPA: 3.21 October 2021 – March 2024

EXPERIENCE

Encorp Berhad, Kota Damansara | IT Intern, Technology and Digital Unit Mar 2026 – Present

- Deliver first-level IT and application support for internal users across departments, resolving laptop, printer, scanner, system access, boot error, and unresponsive-screen issues.
- Support Technology and Digital operations through issue tracking, system monitoring, technical documentation, data validation, and Power BI dashboard/reporting assistance.
- Configure network printers, printer spooler settings, device properties, Microsoft Teams equipment, cameras, speakers, and presentation laptops to maintain smooth office operations.
- Develop and refine PCAD/P&C Service Requisition System workflows using BPMS and ProcessMaker concepts, translating operational requirements into structured digital processes.
- Troubleshoot hardware and network-related incidents, including WLAN cabling support, SSD detection issues, Dell laptop boot failures, server HDD checks, and meeting connectivity setup.
- **Achievement:** Contributed to smoother internal IT operations by combining user support, workflow development, meeting technology setup, and system documentation across multiple departments. Contribute in digitalized system in each department by do the planning system architecture for each department.

Youths Today Sdn. Bhd., Petaling Jaya | IT Intern, Project Management and Execution September 2023 – March 2024

- Supported IT project management and execution by handling assigned project tasks, understanding business process flows, and assisting with coordination between internal and external parties.
- Helped resolve client issues by gathering problem details, communicating requirements, and supporting smooth project delivery during daily operations.
- Developed website components and contributed ideas for user journey flow, user interaction, and UI/UX improvements for company system enhancements.
- Built communication, stakeholder coordination, and problem-solving skills by working across project, technical, and client-facing tasks.
- **Achievement:** Strengthened project delivery support by bridging technical tasks, client issue handling, and UI/UX improvement ideas in a real business environment.

Part time Watson event, Part time Service Assistance, Sports Direct, Machine Operator, Sipro Plastic Industries 2021 - 2025

(Retail, Event and Operations Support)

- Built customer-service and operational discipline through part-time and early work experience involving payment processing, stock handling, customer assistance, product knowledge, quality checking, and production support.
- **Achievement:** Developed strong workplace discipline, customer-facing communication, and quality-control awareness before entering IT-focused roles.

PROJECTS

Healthcare Registration System | PHP, MySQL, HTML, CSS

- Developed a database-driven registration module with structured forms, validation rules, and user-friendly data entry flow.
- Improved the registration process by reducing manual entry friction, organizing patient/user information in MySQL, and making form completion clearer for users.
- **Achievement:** Delivered a working PHP/MySQL registration feature that demonstrated full-stack fundamentals, database design, form validation, and user-centered workflow thinking.

Attendance Tracking System | PHP, MySQL

- Built an attendance module for staff check-in/check-out with a simplified interface and database automation.
- Focused on improving staff check-in speed, reducing repetitive manual record handling, and making attendance data easier to store and retrieve.
- **Achievement:** Created a practical administrative system that translated a common workplace process into a structured, database-backed digital workflow.

Library Management System | Oracle APEX

- Created Oracle APEX modules for book records, borrowing, returns, and structured library data management.
- Designed the system to reduce manual tracking work and improve record consistency across library operations.
- **Achievement:** Applied Oracle APEX and database concepts to build a functional management system for tracking records and transactions.

Food Ordering System | Java

- Built a Java-based ordering application with menu display, order processing, and receipt generation.
- Applied structured menu navigation and clear ordering flow to reduce user input mistakes and support a smoother customer transaction process.
- **Achievement:** Demonstrated object-oriented programming and process-flow design through a working transaction-based Java application.

GPS-Enabled Pace and Distance Monitoring Mobile Apps for Novice Runner | Android Studio, Flutter, Figma

- Developed mobile application and accessibility-focused concepts, including simplified navigation, voice-guidance ideas, and interactive learning flows.
- Explored inclusive design principles for users who need clearer guidance, easier navigation, and accessible interface patterns.
- **Achievement:** Demonstrated inclusive product thinking by designing mobile concepts for learning support and accessibility needs.

LEADERSHIP, ACTIVITIES AND AWARDS

- President, Student Sports Committee, UiTM.
- Python Data Hackathon, 2024, demonstrating practical problem-solving and data skills.
- Participant, Service Learning Malaysia (SULAM) and Braillethon Project 2024.
- Gold Medal, Kuala Lumpur International Invention & Innovation Symposium, Future Inventor, 2024.

CERTIFICATIONS

Oracle Academy: Database Design and Database Programming with SQL.

SKILLS

Programming: Python, Java, C++, PHP, JavaScript, SQL, HTML, CSS, JAVA | **Databases:** MySQL, NoSQL, Oracle APEX.

Tools: Power BI, Figma, Android Studio, Flutter, Microsoft Word, Microsoft Excel, Microsoft Teams, Vs Code, Process Maker, Oracle.

IT Support: Application support, helpdesk support, hardware/software troubleshooting, printer/network setup, system monitoring, issue tracking, technical documentation, BPMS/ProcessMaker | **Languages:** Malay and English.
